

## HEXAGONAL WIRE NETTING

六角网 >>>>

Hexagonal wire netting is also known by the name of chicken mesh at everyday life. Hex.wire netting is made of galvanised iron(GI) and galvanized iron drawn(GID) wire in width of 0.6-2m. Hexagonal wire netting is mostly used in light fencing for poultry farms, birds cages, tennis courts, light reinforcement in splinter proof glass, cement concrete, plastering and laying of roads. It can also used for insulation in cold storage and AC plans.

Electronic Galvanized Hex. Wire Netting			
Wire Gauge	Mesh (inch)	Wire Gauge	Mesh (inch)

21#	2"	24#	3/4"
22#	2"	25#	3/4"

## Varieties

- Galvanized hexagonal iron wire netting
- Galvanized hexagonal wire netting, reverse twisted
- Galvanized hexagonal wire netting with reinforcement, reverse twisted.
- Plastic-coated hexagonal wire netting
- Width: size 3'x100', 4'x100', 1mx25m and other width according to customers' requirement.
